This conference, as the 11 successful previous ones, will be held in Polyana, Svalyava region, Zakarpatska oblast, Ukraine, in the Carpathian Mountains and approximately 190 km drive south of Lviv. Lviv is one of the oldest historical cities in Europe - industrial and educational centre of western Ukraine. There are international airport, railway, and bus stations in Lviv. We hope that the wonderful scenery and healthful air of the Carpathian Mountains will make for fruitful work at the conference and leave pleasant memories about it.
Topics include, but not limited to:

- Analysis, modelling, research and design methods of microsensors and microactuators;
- Software systems, models, algorithms, methods and strategies of embedded systems design;
- Field issues in embedded systems modelling and design;
- Issues of testing, verification, reliability and optimization in embedded systems modelling and design;
- Sensors and actuators systems, nanotechnology;
- Biomedical circuits and systems;
- Energy-efficient wireless sensors;
- Sensors and actuators for smart devices;
- Applications for electron device design;
- Information technology, application of informatics;
- Engineering education.
